Active Learning Method

Program: B. Tech – CSE

Academic Year / Yr-Sem : 2025 - 26 / II - I Sem

Course Title & Code: **24AD2103/R – DATABASE MANAGEMENT SYSTEMS**

Date:

Time:

Venue:

CO#	1
Topics	Entity Relationship Diagram (Cab Management System)
Type of ALM	Case Study
Learning Approach	Participatory Learning

Procedure of ALM:

1. The faculty should provide a case which could be a person or a group or a unit or a corporate division.
2. The case study can be exemplary, cautionary, or instructive.
3. Exemplary and cautionary case studies are presented in total to serve as a model for success or failure, for example
4. Instructive case studies can present problems that require identification through clues, symptoms, or outcomes and consist of background information that can be ambiguous, incomplete, or hidden

Rubric of ALM:

Marks to be awarded	5M	3M	1M
Identifies and summarizes the problem at issue and reaches a conclusion.	Accurately identifies the problem, effective in assessing and reaching a convincing conclusion.	Identifies the problem but provides a poor assessment or reaches an inappropriate conclusion.	Does not identify the problem at all nor provides a effective assessment or a definitive solution.

Case Study:

The latest cab services agency in the city has approached you to develop a Cab Management System for them. They would be using this software to efficiently manage and track different cabs that are operated by them. Cabs are solely owned by the agency. They hire people in contracts to drive the cabs. A cab can be uniquely identified by, like any other vehicle in the country, its license plate. A few different categories of cars are available from different manufacturers. And a few of them are AC cars. Cab drivers are given a identification card while joining. The ID card contains his name, permanent address, phone number, date of joining, duration of contract. Also, an unique alphanumeric code is assigned to each number. The agency provides service from 8 AM to 8 PM. whenever any passenger books a cab, an available cab is allocated for him. The booking receipt given to the passenger contains the car #, source and destination places. Once he reaches the destination, he signs on a duplicate copy of the receipt and gives back to the driver. Driver must submit this duplicate copy signed by the passenger at the agency for confirmation. To evaluate their quality of service, the agency also wants a (optional) customer satisfaction survey, where passengers can provide feedback about their journey through the agency's website.
